Saudi Capabilities

Introduction

Overview

Saudi Capabilities Company is a top notch technical pioneer company specialized in integrated technical solutions and applying technical systems in KSA for individuals, companies and authorities. The solutions we create include communication, situation awareness, decision making, command, control, security, protection and much more. Our technical support, systems development, electronic communication, surveillance & reconnaissance, reverse engineering, digital development, and satellite communications units are all working together in a perfect harmonic atmosphere to build the ideal solutions aiming to achieve customers trust by exceeding their expectations.

Being certified from ISO 9001 & CMMI certificates, SCC is qualified to place a high position among top IT companies, as it provides customers a broad range of high-quality technical services and products, starting from strategic & informative planning, institutional architecture, governance systems and performance measurement till the final implementation of initiatives, systems, applications and software with applying professional project management skills, and using all technical and human resources required.

CEO Preface

Dear readers.

I am honored and extremely privileged to lead “Saudi Capabilities Company” holding a key position as CEO of the company. We, SCC team, work together to achieve our company’s profitable development and glory. To reach our strategy, we use the leading-edge technology inside workplaces, and we partner with world class strategic international alliances to enable our customers to achieve required organizational power and to maximize the potential ability to achieve revenues.

“

We believe that a high-level of professionalism and dedication in a motivating environment of team work is the way to reach the elite of top companies.

”

Othman Hamad AlFaris
CEO

SCC Company has the greatest competitive advantage naturally, which is a great working team of dedicated professionals and experts who we value, and who are striving to render profitability and enhance the company’s value. We proudly invest in researches and development to train our people, which reflects on performance and profitability as well. We believe that a high-level of professionalism and dedication in a motivating environment of team work is the way to reach the elite of top companies.

As we continue to provide the region with services, we realize clearly the obligation we have towards society. SCC builds trusted partnerships with different partners, seeks market leadership, and adheres to core values. SCC departments work on expanding producing the essential products and services, as well as launching initiatives for organizations where future market growth is projected.

Othman Hamad AlFaris
CEO

Saudi Capabilities

About SCC

History

Al Faris establishment for ICT Was founded in 2003 to provide services and solutions with the required efficiency and experience for customers. The company’s progress and growth in information technology and communication was remarkable in the past three years. Then the company has acquired new name “Saudi Capabilities Company”. Till we reached the year By 2008, we cooperated internationally with major production and manufacturing companies internationally, we partnered with International strategic partners in different sectors. By 2010, we have gained design and operation experience by diversity of task and processes, currently “Saudi Capabilities Company” is capable to form coherent and integrated solutions to support our diverse partners.Saudi Capabilities Company is also introducing a new technology through research, development, as well as the potentials and capabilities our strategic partners have.

2003

“ We started ”

2008

“ We cooperated with major production and manufacturing companies ”

2010

“ We gained design and operation experience by diversity of tasks and processes ”

2014

“ We are now able to form coherent and integrated solutions to support our diverse partners ”

Vision

To be a world-class manufacturer in technological solutions provided in a highest quality that exceeds customer expectations, through innovation and high performance.

Mission

We are technology leaders that have the capacity to create a change in Information technology world for individuals, corporates and authorities, through creating individual & integrated solutions in communication, situation awareness, decision making, command, control, security and protection. These solutions are developed by passing through different stages of design, implementation, testing, installation, operation and maintenance.

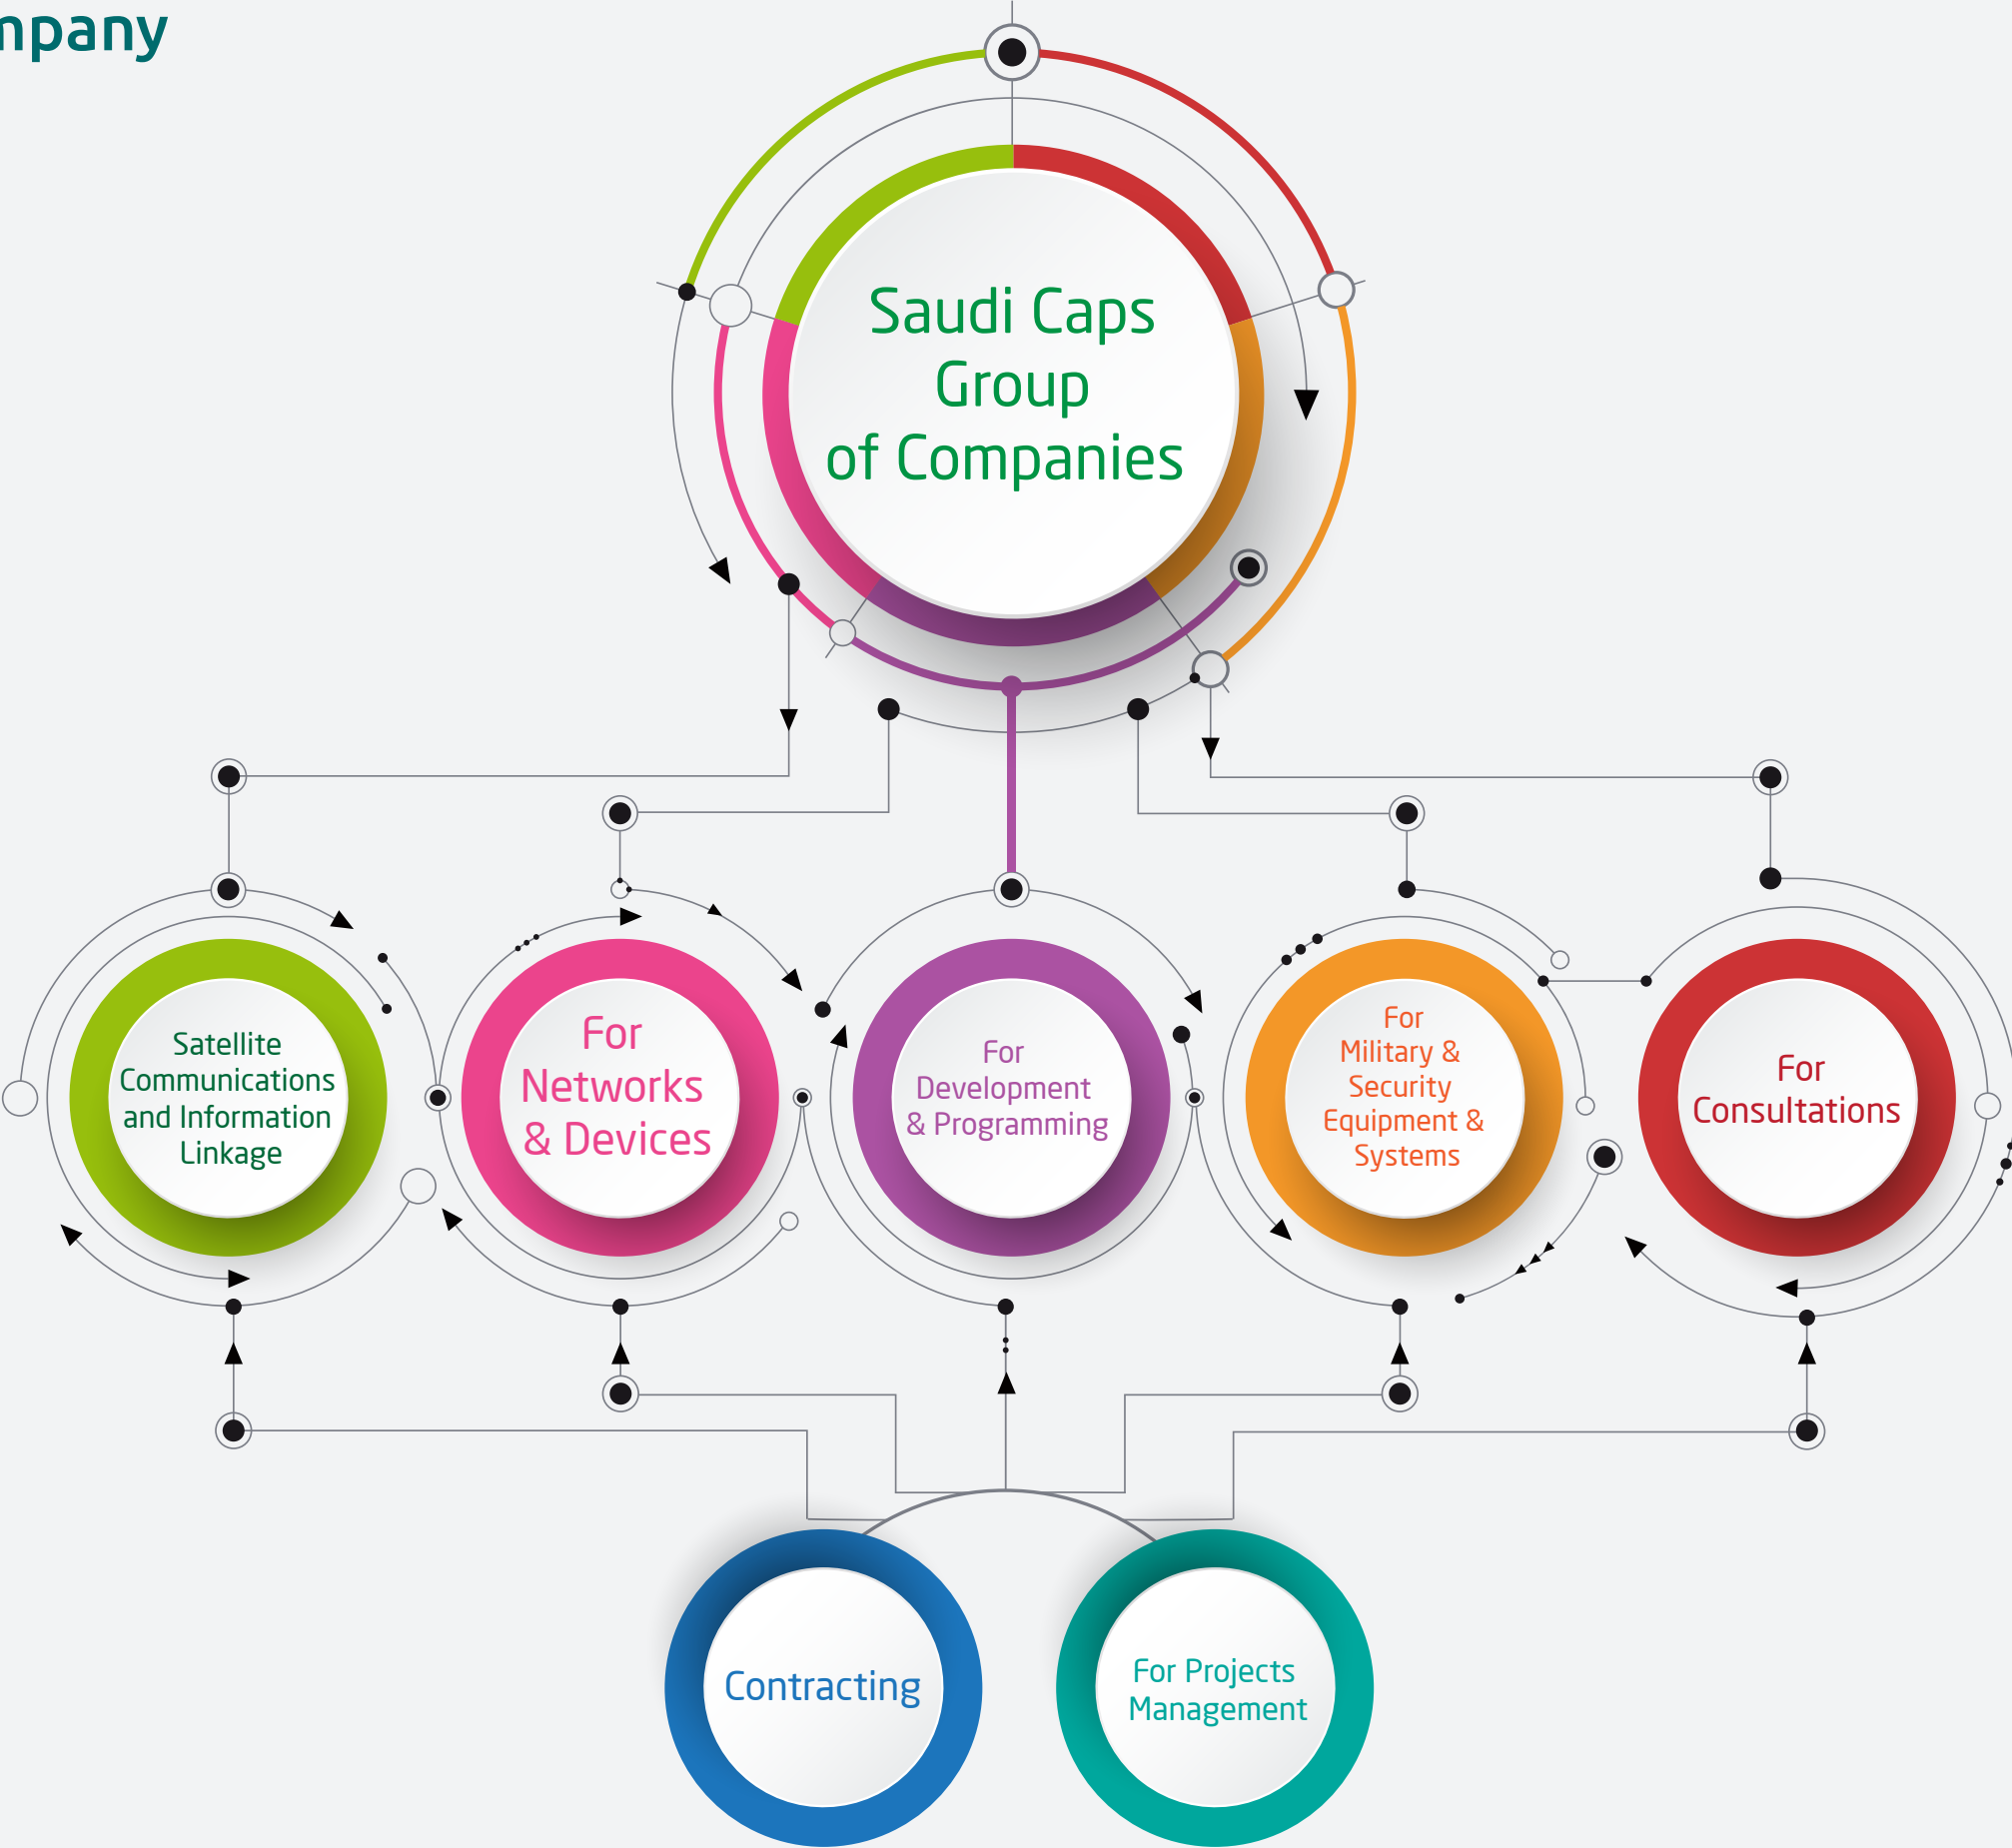

Values

- Quality

- Commitment
- Innovation
- Professionalism
- Teamwork

Group of Company

Our Strategic Partners

Strategic Partners

“

”

We deal with providers of

1. Surveillance CCTV Cameras
2. Aerial Surveillance & Reconnaissance
3. Alarm Systems
4. Border Control
5. Infrared CCTV
6. Ports & Coastal Areas Control
7. Wired & Wireless Networks
8. Command & Decision-Making Support
9. Mobile Command Centers
10. TETRA Networks

Saudi Capabilities

Qualifications

Our Licenses

We are certified by:

Quality Management System “QMS”:

Quality consider as our culture & philosophy. The International Quality recognitions of SCC is the first step toward Excellence:

Capability Maturity Model Integration (CMMI) Level 3

We used CMMI as a guide for our process improvement, and already certified for CMMI.

Saudi Capabilities

Licenses

4

licenses

- Designing Geographic information systems and applications
- Providing space communications services
- Supplying Military & Security Equipment & Systems
- Providing consultancy in the field of communications & information technology
- Hosting of communications and information technology devices
- First / second rating in the areas of telecommunications and information technology

Smart Systems for Building & Facility Operation

We provide our services for different market sectors:

1. Government/Security Facilities

Surveillance of borders & critical areas
Infrastructure areas
Metropolitan security areas

2. Municipalities and General Contracting

Commercial areas
Residential areas

3. Big Events

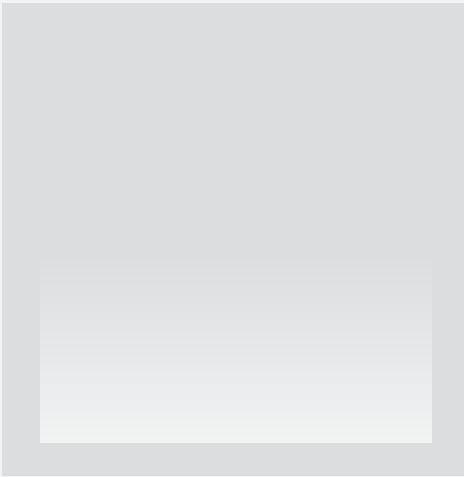

Exhibitions
Recreational Events
Sports Events

4. Ports / Airports Authorities

Airports
Ports

5. Industries

Chemical factories
Oil & Gas fields
Steel factories

Products & Services Saudi Caps have accomplished

N	Product & Service Description	Qualified Activity	Contractual Executed Experience
1	Command & Control & Monitoring Center (Operation)	Supply, Installation, & Operation	We have a simulated Center in the company premises
2	Strategic Security Systems	Design, Supply, Installation, & Operation	Done
3	Signal & Communications systems, Devices & Equipment	Design, Supply, Installation, & Operation	Done
4	Monitoring & Communications tools, Devices & equipment	Design, Supply, Installation, & Operation	Done
5	Secured Satellite Communications systems & Devices	Design, Supply, Installation, & Operation	Done
6	Defensive Jamming & Blocking Devices & Systems	Design, Supply, Installation, & Operation	Done
7	Command & Control Centers (Fixed & Movable)	Design, Supply, Installation, & Operation	Done
8	Monitoring Radars Systems	Supply, Installation, & Operation	Done
9	Operation Development systems & Devices	Supply, Installation, & Operation	Done
10	Satellite information linking networks	Design, Supply, Installation, & Operation	Done
11	Main ground stations for satellite communications (command & control & monitoring centers)	Design, Supply, Installation, & Operation	Done
12	GIS & Location detection tools	Design, Supply, Installation, & Operation	Done
13	Logistic & Consulting Services	Supply	Done
14	Civil Works completing executive work in projects	Design, Supply, Installation, & Operation	Done
15	Electric & Power works completing executive work in projects	Design, Supply, Installation, & Operation	Done
16	Tactical training & knowledge development	Design, Supply, Installation, & Operation	Done
17	Operational Training & competence development	Design, Supply, Installation, & Operation	Done

Lifetime of Achievements

Gaining the Development Ability
(Acquisitions)

A close-up photograph of a person's hand holding a small, detailed model of a city skyline with several skyscrapers. The background is a blurred office setting.

Knowledge and Experience Transfer
(Integration)

A photograph showing two hands stacking wooden blocks on a wooden surface. One hand is placing a block on top of a stack of three other blocks. The background is a blurred office environment.

One Style with Customers
(Our own Strategy)

A photograph showing the silhouettes of two men in business suits standing in front of a city skyline at night. The man on the right is wearing a traditional Middle Eastern headscarf. The background is a blurred office setting.

Solutions that we provide

Solutions of Communications, Networking and Connectivity

Solutions of Consulting and Project Management

Solutions of Military and Security Systems

Solutions of Strategic Systems and Decision- Making Support Systems

Training and Workshops

Operation centers

Linking troops & weapons & leaders through unified communication systems according to requirements to enhance following up & guidance in a secured trusted methods.

Field communication transfer from the operation field to the command & control centers wherever they are even when there are no communication networks or ready infrastructure.

Compatibility with different communication systems like cellular communications GSM, Satellite communications VSAT microwave communications,

Mission & operation transfer from the field to the operation centers & command & control.

Providing communications & secured data transfer, trusted & based on military standards.

Training

Knowledge is a major part of success

Operating Training

Operation capability training

Customer is trained on the process of operating & primary maintenance "on job training" & also at the manufacturing company premises. We also provide advanced training specialized to increase efficiency & develop capability.

Operation assist & client support

“

Saudi Caps poses the qualified national & international resources highly efficient to do maintenance & support at any time 24/7

”

Maintenance & Technical Support

Warranty

Is the commitment of the production company through Saudi Caps to perform the processes of qualifying the client to perform level 1 maintenance and Saudi Caps performing level 2 & 3 maintenance & commitment from the manufacturer to do level 4 to guarantee the devices & programs & systems by providing updates & warranty to devices & systems from manufacturing errors leading to product not functioning as expected.

Executive maintenance as follow:

Is a general inspection process including:

Examination

Operational examination for all the system components & assuring the safety of its operation performance & this is done through specific document we call full inspection document.

General examination to make sure all operational components exists & all are safe from any damage that affect the performance or might cause any future malfunction.

Update

Is the process of insuring that all system programming & technical components are up to date according to the instructions of the manufacturing company.

Testing

Is the process of insuring the system performance in all the operation stages & insuring the quality of the performance in every stage.

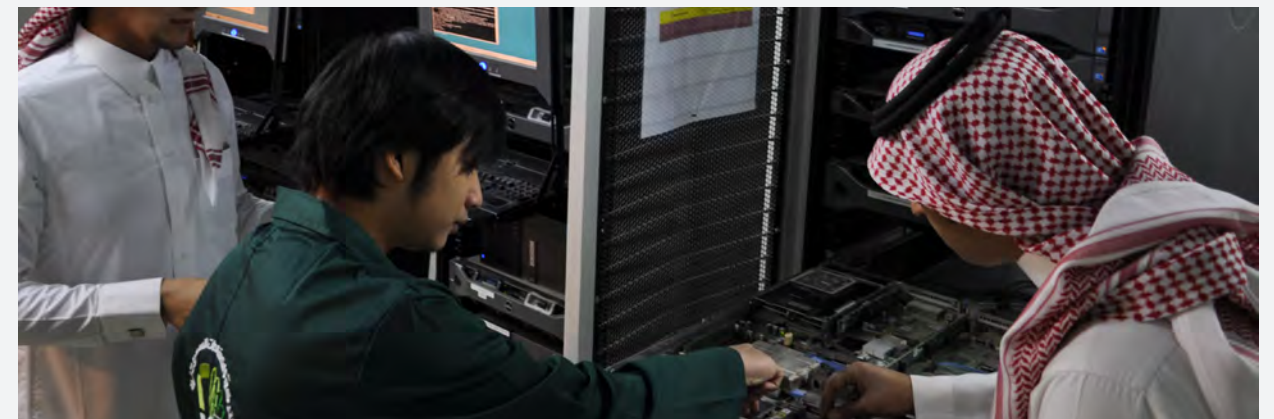

Preventive maintenance

Is a group of examinations & services that is done periodically according to a specific time plan (determined by the manufacturer or by the experienced technical people who perform the maintenance) to fix any issue if any before failure happens. Including reinstallation or replacing consumable parts like batteries & reconnecting & fixing, examining the cooling systems & examining the vehicles and other relevant operations to performing the cleaning and lubrication leading to preventing or reducing failures.

Corrective maintenance

Is a group of processes done to fix systems if any sudden failure or damage happened leading to stopping or incorrect performance after reporting the problem using accredited communication methodologies. Always this failure is a result of not following the factory instructions (wrong operation) or not performing the correct preventive maintenance or for reasons related to performing missions that affect inversely or manufacturing errors which require replacing consumable parts according to level 3 maintenance & this is done internally inside Saudi Caps or requires level 4 maintenance that is included in the factory warranty
